

Shriners
Children's™

Your Gifts in Action

Impact Report

WELCOME

The Shriners Children's™ story is unlike any other. Founded more than a century ago through the vision and generosity of a committed fraternal organization — the Shriners — we have grown to become a specialty pediatric health system unparalleled in scope and scale.

Philanthropy is the foundation of our unique achievements. As a donor, *you* are the hero of our story.

You may have been inspired to give because you saw our kids on television. Perhaps you heard a story from a friend about the impact of Shriners Children's during their childhood. Maybe you read an article featuring a patient's parent. Or you may have witnessed firsthand the power and compassion of Shriners Children's physicians, nurses and staff.

You were inspired and you chose to give back; we are grateful and humbled by your generosity. You inspire us.

Our commitment to you is simple and straightforward: We will make the most of your gifts through thoughtful, responsible stewardship. Your support is critical. Philanthropy represents more than half of our annual revenue. Together with your generous donations, we are ensuring that Shriners Children's continues to deliver on our mission to transform the lives of kids and families.

In the following pages, you'll find a snapshot of some of the achievements and programs made possible through your generosity. I am honored to share with you "Your Gifts in Action."

Level I Verification for Shriners Children's Northern California

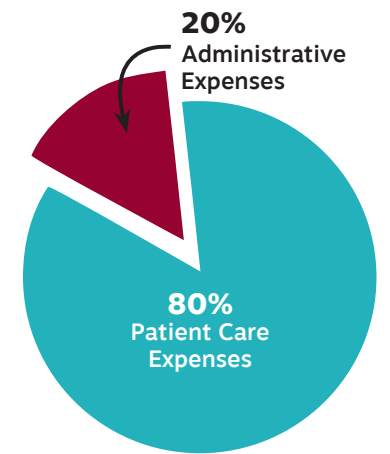

Shriners Children's Northern California is the second pediatric hospital in the nation to obtain verification as a Level I Specialty Children's Surgery-Musculoskeletal Surgery Center by the American College of Surgeons (ACS). This is the highest of three levels of ACS surgical verification a pediatric hospital can receive. ■

OUR MISSION TO TRANSFORM LIVES

QUALITY CARE

Provide the highest quality pediatric specialty care within a compassionate, family-centered environment.

RESEARCH

Conduct research to discover new knowledge that improves the quality of care and quality of life for children and families.

MORE KIDS MORE PLACES

Expand care through our locations, international outreach efforts and clinics, telehealth opportunities and community affiliations.

EDUCATION

Provide quality educational opportunities for physicians and other health care professionals.

This mission is carried out without regard to race, color, creed, sex or sect, disability, national origin or ability of a patient or family to pay.

Locations Ranked by U.S. News & World Report in 2023

- #13 Shriners Children's St. Louis (together with St. Louis Children's Hospital — Washington University)
- #20 Shriners Children's Northern California (together with UC Davis Children's Hospital)
- #42 Shriners Children's Lexington (together with Kentucky Children's Hospital)
- #43 Shriners Children's Portland (together with Doernbecher Children's Hospital)

OPENING MORE DOORS TO KIDS

Pediatric Care, Close to Home

After a hiatus due to the pandemic, Shriners Children's has resumed global travel. Recently, a team returned to Cyprus, an island country located in the eastern Mediterranean Sea. Here, Shriners Children's fills a critical need for pediatric specialty services in orthopedics, orthotic and prosthetic fabrication and more. While there, the team saw 143 patients from Cyprus and other countries including Egypt, Lebanon, Greece and Turkey.

Another team traveled to El Salvador to provide medical intervention to patients with scoliosis. The team also provided training for medical professionals there. ■

A longtime patient in Cyprus receives updated prostheses for the first time since he was 12. These new legs are a more comfortable and age-appropriate fit for the 16-year-old, who has grown significantly since he was last seen by Shriners Children's. Behind him is a picture of his first prosthetic fitting.

Daniel, a two-sport high school athlete, injured his knee during a wrestling match. As part of his treatment at Shriners Children's Spokane, he uses a Boost antigavity treadmill, which allows him to run or walk using as little as 20% of his body weight. This offers a safe, non-weight-bearing solution for fitness without the risk of re-injury.

Ready to Play

From injuries sustained on the playing field to those on the playground, our sports medicine programs specialize in the specific needs of children.

The experienced teams at Shriners Children's know children and teens are not just small adults. Growing bones and growth plates require special attention, as do children's joints and muscles. To support recovery, treatments are customized to meet each child's needs — from colorful casting to advanced therapy technology such as antigavity treadmills.

Our Shriners Children's sports injury care teams include therapists, prosthetists, surgeons and more. The teams' collaborative and innovative approach to caring for young athletes is allowing more kids to get back to the activities they love. ■

The Telehealth Connection

Families and providers are grateful for the opportunity telehealth provides.

Your support enables our young patients greater access to the individualized specialty care they need regardless of their location.

Additionally, it is now possible for a child who requires care from multiple specialty providers located across the country to receive the care they need without even leaving their home. ■

RESEARCH

Genomics: Transforming Pediatric Care

Five years ago, the genomics institute launched at Shriners Children’s. Its purpose: To improve outcomes for children with cerebral palsy, scoliosis and other neuromuscular conditions.

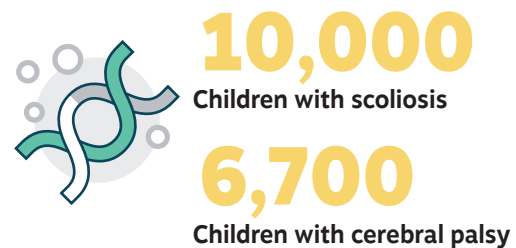

Genomics, the study of genes, makes it possible to predict, diagnose and treat diseases more precisely and personally than ever.

Each year, Shriners Children’s collects a diverse set of genomes to help us determine if their unique characteristics are disease-specific or population-specific. This research has the power to help Shriners Children’s and other global health care organizations develop more targeted treatment plans for young patients.

The amazing genomics research your gifts are powering includes:

- Examining scoliosis patients’ DNA to identify genes contributing to the condition.
- Identifying the genetic causes of arthrogyrosis (crooked joints) and finding ways to alleviate incapacitating symptoms, such as muscle contractures and severe pain.
- Understanding the role genes play in the development of cerebral palsy. ■

Annually, Shriners Children’s cares for

POPS

POPS Expands Possibilities for Patients

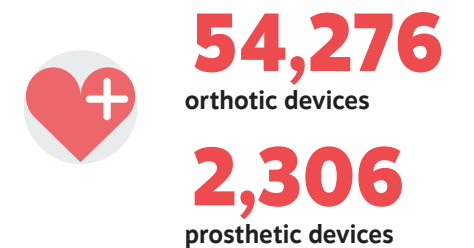

Shriners Children’s Pediatric Orthotic and Prosthetic Services (POPS) designs, manufactures and fits orthotic and prosthetic devices for children of all ages.

As kids grow, their devices are customized and refitted to meet their needs and interests – allowing them to walk, run, jump and play.

In the past year, POPS introduced TLSO sensors and monitors for idiopathic scoliosis braces as part of the standard of care. This rollout provides real-time data on the hours

per day a thoracic lumbar-sacral orthosis is worn. Since outcomes are related to brace wear, this data will help inform individual patient treatment plans, helping improve effectiveness of this scoliosis treatment. ■

In 2022, POPS delivered to patients

Isaac (right) was born with a limb difference; one of his legs never developed past the knee. He was just a baby when he made his first trip to Shriners Children’s Texas. As a teen, he has won multiple gold medals as a Paralympian. He hopes to become a motivational speaker and share his story with others.

WAYS TO GIVE

There are many ways you can donate to help kids receive the pediatric specialty care they need and support the mission of Shriners Children's to change and improve the lives of children — wherever they may live.

Charitable Gift Annuities

(If permitted in your state)

An irrevocable contract between you and Shriners Hospitals for Children®. You transfer cash or other assets to us in exchange for guaranteed regular payments (to you as the donor) for life. The payment amount is determined by your age when the annuity is initially funded.

Donor-Advised Funds

A donor-advised fund (DAF), which is like a charitable savings account, gives you the flexibility to recommend how much and how often money is granted to Shriners Hospitals for Children and other qualified charities.

IRA Charitable Rollover

If you are age 70½ or older, you may make tax-free charitable gifts of up to \$100,000/year directly from your Individual Retirement Accounts.

Wills, Trusts and Bequests

A bequest is given by identifying Shriners Hospitals for Children as a beneficiary in your Will or Trust.

Gifts of Appreciated Assets

Shriners Children's gratefully accepts gifts in the form of stocks and appreciated securities. There are no capital gains taxes to be paid and, if you itemize deductions on your tax return, you may be able to claim the full appreciated amount as a charitable deduction up to 30% of your adjusted gross income.

Gifts of Real Estate

Donate any property type (land, homes, commercial), and net proceeds go directly to supporting our mission.

Give in Honor or Tribute

Pay tribute to a special person in your life with a donation made in their honor.

Cryptocurrency

Make a charitable gift in Bitcoin or another cryptocurrency.

Cash

Donations in the form of cash, check or credit card are always appreciated.
